

SMOKE SCREEN FLUID CONTAINER

CAPACITY

- 1,000ml.

TOTAL OUTPUT

- Smoke production for 7 minutes.

DIMENSIONS

- 6.5(H) x 27(L) x 7(W) cm.
- Weight: 1.22 kg.

The Smoke Screen fluid container has been designed to give the most flexible options of consumption.

Intelligent sensors monitor the level and can provide an accurate reading for both low and empty levels even if the generator is installed in a horizontal or vertical attitude.

A quick connector means that the fluid exchange is extremely fast and easy, a tamper ensures that any unauthorized access will signal an alert to the control centre. The sealed construction of the fluid bottle also means that only genuine and approved liquid can be used ensuring the driest smoke output all the time.

CAN'T SEE IT? CAN'T STEAL IT!
