ILIA

mod. ERHS0712-PRO

HIGH SENSITIVITY LINE DETECTOR

General characteristics

Detector whole design, technology, style and manufacture are all Italian

- Use in harsh industrial environments where they are always present dust, vapors and aerosols
- > Extremely easy to install and program
- > Very inexpensive to assemble, wire up and maintain
- > The detector can be installed horizontally or vertically and can work at any angle
- The integrated diaphragm permits a wide range of adjustments
- > To be used only in combination with CSRLS-PRO

Control Unit for the programming, calibration and performing of remote tests on line detectors, with the following possibilities:

- Configuration with mandatory use of the expansion card (SMLS) for the connection from 1 to 5 detectors (with prealarm output), or from 1 to 8 detectors (without the pre-alarm output) and loop line (optional)
- > Only in combination with ILIA ERHS0712-PRO
- > On site installation at reachable height
- Prealarm outputs (if enabled), alarm and fault indications separate for each detector
- > Operational access to the program keyboard is protected by password
- > Control Unit and/or Control Panel reset facility
- > The detectors are also available as PRO-L with dustproof extension (assembly not compatible with SOHI)
- Possibility to mount detectors in protective containers SOHI (ref. technical sheet Mod. SOHI) for environments with aggressive atmospheres or where high pressure jets are used for cleaning (assembly not compatible with PRO-L)

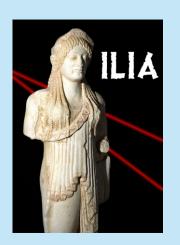

Base can also be installed separately from the detector for prewiring

- > Plug-in base for detector connection
- Back up board to ensure continued working even after short circuit

Key special key for alignment, diaphragm adjustment and opening and closing of the base and of Control Unit

Product features

- The system is made up of the following components
 - > Receiver (Rx)
 - > Transmitter (Tx)
 - > Control Unit (CSRLS-PRO)
 - > Special key for alignement
- ♦ Standard EN 54/12 and 54/17
- ♦ Protection degree IP65
- ♦ RoHS compatibility
- Thermoplastic PPE + PS case with High Impact resistant and with self extinguishing material - class V0
- Complete directional stability over time
- Operating distance
 10 to 200 m
- Connections by serial line RS485, 4 wires
- Sensitivity adjustable and selectable over a wide range, using the control unit CSRLS-PRO
- High immunity threshold to avoid the environmental disturb
- Automatic threshold compensation
- ♦ Test alarm function
- ♦ Pre-alarm output
- ♦ Maintenance request
- Automatic reset of detector after break in infrared beam
- ♦ Fault output relay that can be delayed up to 254 seconds
- Self-tester for RS485 communication
- Angle misalignment:
 ± 1 degree max
- ♦ Power supply 24V DC
